

Auger (SDA)

Cutting Width	1.4 - 2.0m
Overall Width	120mm wider than working width
Cutting Height	10 - 120mm
Power	65hp max
Linkage	Cat 2/1
Weight	360-795kg

Side discharge auger(sda) designed specifically to discharge cut material and deposit in at the foot of the row to aid with weed suppression, maintain moisture in the soil in times when rain fall is sparse.

As standard the sda has a 230mm auger, 60 litre per minute hydraulic motor, with rotation speed variable from 100-675 rpm. An 8mm mdpe auger liner to aid with smooth flow of material and reduce noise and wear on the auger. 100mm 1.2kg hammer flails will mulch up to 60mm material. 3 drive drive the auger at optimum speed up to 1.6m. 4 drive belts fitted to the larger machines. Front and rear mount as standard with 1000 pto speed.

540 pto as option available.
